Abstract (en)  
[origin: WO2006047202A2] One or more communications devices in communication forming a calling group. A server associated with the communications devices transmits information to the individual members of the calling group. For example, an incoming information transmission is received from a communications device. The incoming information transmission is recorded in a memory of a server. The incoming information transmission is transmitted to the individual communications devices of the members of a predetermined calling group.
