Abstract (en)

An antistatic sole (2), for conveying electrostatic charges to the ground, is made of antistatic material (14) comprising a matrix of polymeric material (13) and in which there are additives with antistatic properties. An antistatic shoe (1) comprises an antistatic sole made of the antistatic material described above. The process for producing the sole involves the addition of antistatic additives, such as carbon powder, to a matrix of polymeric material, for example synthetic rubber.
