Abstract (en)

The link has a strand (14) whose front end (22) has a watch fixation device. The device has a casing (24) and two coaxial fixation pins to fix a transverse staff. Each pin has a free end which is pivotably received around the staff in one of two opposite orifices of a watch. The casing has a lower plate (32) and an upper back plate (34). The end (22) has a holding pin (44), which is fitted vertically into a sink (46) of the lower plate. The upper back plate (34) is fixed to the lower plate (32) by trapping the front end so that the casing is fixed to the strand.
