Abstract (en)
Food plate with exchangeable images comprises an upper plate (1) with a window (2), a lower plate, and an image carrier (4) arranged between the upper and lower plates. The upper plate is fixed on the lower plate by at least one central fixing element. At least one rotating image carrier is positioned on the fixing element so that during its rotation different images can be seen in the window. An independent claim is also included for an alternative food plate for children. Preferred Features: The fixing element consists of a pivot pin. At least one recess (8) is provided in the peripheral region for rotation of the image carrier.
