Abstract (en)  
A hair clipper includes a main body (1) provided with a hair-cutting knife (2) portion at a leading end portion, and an attachment (3) for adjusting a cutting height, the attachment (3) being removably and slidably mounted to the main body (1). The attachment (3) has a substantially U-shaped cross section and is adapted to cover a lower portion of the main body (1). Further, the attachment includes crook pieces (31) integrally formed at opposite top edges of the attachment to define downwardly opened grooves, respectively. The main body has guide ribs (19) fitted in the respective grooves of the attachment to guide sliding movement of the attachment. Furthermore, the main body includes spring members (12) arranged at opposite sides thereof for outwardly pressing internal side surfaces of the attachment, respectively.
