Abstract (en)

[origin: EP1800812A2] The woodworking machine, especially a format circular saw, has a limit stop (5) with two rotary axes (I,II). The first axis (I) has an immovable position in relation to the limit stop but rotates in its guide (2) parallel to the cutting line (S). The limit stop can move longitudinally at the second axis (II), fixed to the worktable (1). The limit stop has a rotating bolt guide (8), at the worktable, to give a variable cutting angle (a) and/or a guide bolt (3) at the first axis (I) and/or the fixed first axis is between the second axis and the cutting line.
