Abstract (en)
[origin: EP1800870A2] The cartridge has a closure (5) for outputting liquid into pasty media. A valve body (12) is arranged in an interior of a mouth piece (9). A sleeve (25) with an outlet (30) is axially movable to the mouth piece, where the outlet is limited from a sealing lip (29) and is combined with the valve body. The body is movably arranged within the mouth piece relative to the sleeve. The outlet is locked and/or released based on a movement of the valve body. The valve body is axially movable and guided in the mouth piece by a fastening bolt (10). A hollow space is sealed between the body and the bolt.
