Abstract (en)

[origin: EP1801025A1] The cover has a hook (24) stitched with the cover using a fabric strap (28) and suspending the cover from a support, where the cover is made of an elastic material. C-shaped section bars (16A, 16B) and rigid bars lie parallel to each other. An I-shaped bar (18) has two mutually parallel end portions forming respective slides received in slideways (26), and a central portion (20) on which the hook is engaged. Independent claims are also included for the following: (1) an assembly comprising a bumper skin stowage device and a cover (2) a method of stowing a bumper skin in a transport vehicle.
