Abstract (en)

The present invention relates to a bottom apron or belt control device in roving frame drawing trains, comprising a drive roller (7) for the drawing of one or more bottom aprons (6) and a support profile (8) of said bottom aprons, the drive roller (7) and the support profile (8) being assembled on a support or bracket (10) which is positioned and fixed on a fixed pedestal (1). The device comprises a bottom roller (9) for supporting one or more bottom aprons (6), said bottom roller (9) being directly or indirectly fixed on the movable support or bracket (10) arranged a fixed distance from the drive roller (7) and from the support profile (8) of said bottom aprons (6) independently of the position of the bracket (10) with respect to the fixed pedestal (1).
