Abstract (en)

[origin: EP1801308A2] A pocket-like receptacle (4) is provided in or on a cover limb (3). The edge area (16) of a drainage layer (6) is received in the receptacle so that edge of the drainage layer and the run-off openings (8) are protected to prevent penetration of substances or particles from build-up of layers of the balcony or terrace. The lower surface (17) of the pocket-like receptacle is formed from a portion of the stop profile constituting an extension of the fixing limb (2).
