Abstract (en)
[origin: EP1801315A2] The end fitting has a parallelepiped shaped base element (2) with lower and upper cleats (3, 4) reinforced by ribs (5), where the fitting is made of a plastic material e.g. PVC. The cleats are arranged in a front face (EFGH) in a longitudinal direction on both sides of a preset plane parallel to longitudinal faces (ABFE, DCGH). The cleats are offset with respect to longitudinal symmetry plane of the base element. The cleats present projections, on a projection plane parallel to lateral faces (AEHD, BFGC), symmetric with respect to the line of the predetermined plane on the projection plane.
