Abstract (en)

A bolt arrangement (20) has a washer (28) held, in use, at a fixed position relative to a button (26). The washer (28) is integral with a bolt (22) and connected by a live hinge (39). The button (26) is connected with the bolt (22) by links (32,36) which meet at a live hinge (34). When the button (26) is depressed, with the washer (28) held, forces applied to the links (32,36) cause them to fold together at the hinge (34), raising the bolt (22) about the hinge (39).
