Abstract (en)  
[origin: EP1801331A1] The support has a fixing unit comprising a rigid connection leg (6) that lies perpendicular to a plane of a support (1) and is extended by a coupling zone (7) which extends transversally towards the center of the support. The coupling zone includes two parts that are presented in a form of a plate comprising flat bases (8, 9) and frontal ends (10, 11), where the two parts have different heights and are shifted laterally towards the center of the support in a longitudinal direction.
