Abstract (en)
[origin: EP1801425A1] The kit (20) includes plate like valve (2) arranged in row direction (3) at right angles to principal plate plane (15) which has core module (4) having multiple valve ducts (14) extending at right angles to respective principal plate plane. A valve encasing element (27) separates from core module fixed by mutually matching an electrical interface (26) such that selected combination of core module with encasing elements of different type valves are produced for different purpose.
