Abstract (en)

[origin: EP1801669A1] The device has a shaft with a spiral-balancer of an oscillator, and a pinion (3) engaging with a moving body (4). The moving body has an axle (7) on which an indicator (12) is fixed, where the indicator is disposed above a dial. The dial carries graphics indicating zones of good operation of the balancer. The indicator is in the form a needle (18) fitted on the axle in which a toothed wheel is equipped.
