Abstract (en)
[origin: US2006089082A1] A reusable, washable breast shield for use by lactating women. The shield comprises a plurality of laminated silicone compound membranes; the outer laminate of a generally higher durometer than the inner laminate. The shield is placed against the breast of the user and may be held in place with an article of clothing or may be used without supporting clothing. The shield may also be incorporated into an article of clothing. The shield is thin and translucent and is relatively unnoticeable under clothing. The shield may be manufactured in decorative shapes and colors.
