Abstract (en)

[origin: US2009054865A1] The invention relates to a closing cap for containers that are filled with medical liquids. The closing cap includes removal and injection sites. The removal site has a first opening for removing the medical liquid and is obturated by a first pierceable self-sealing membrane. The injection site includes a second opening for injecting an additive and is obturated by a second pierceable self-sealing membrane. The first and second membranes are configured differently.
