Abstract (en)

[origin: WO2006045560A1] The invention relates to extensive and precise information concerning a cable, for example production information that is provided by the manufacturer. The invention also aims to facilitate the access to said information, for example to a continuous number of metres. The inventive cable (40) therefore comprises a transponder assembly (10) with a memory (123) for storing digital data (1231) and a transponder for the wireless transmission of said digital data (1231).
