Abstract (en)
[origin: WO2006039481A2] A surveillance system and method performing actions and interacting with a base system including at least one wireless input capture device ICD(s) and a corresponding digital input recorder (DIR) and/or another ICD, and, optionally a remote server computer (RSC), including the steps of providing base system; at least one user accessing the DIR via user interface either directly or remotely; activities and functions within the system and methods of set-up and operation capable of being performed via single click-select interaction or one-click action by the at least one user through a user interface or directly on components in the base system, which correspond to underlying preprogrammed actions or steps performed automatically by the system following the single click-select action of the user, thereby providing a secure surveillance system having wireless communication for monitoring a target environment.
