Abstract (en)  
This invention relates to a display hook (101) comprising a body (103) having a rear end and a front end, an elongate package reception part (105), which is arranged to receive packages thereon, which is removably connected with the body, and which is mountable at the body from the front end thereof. The body has a hook support portion (117) at the rear end thereof, and a connection portion, and the package reception part has connection means, which is engaged with the connection portion.
