Abstract (en)

[origin: WO2006038814A1] Device for cutting net ropes (1) from fishing net (5), the device including a guiding system for the net rope, a cutting device (7) and a pulling system (6) which pulls the net rope through the guiding system. The guiding system includes at least one plate with a longitudinal slit (3), whereby the net rope (1) when guided over the plate is support against the slit, and that the fishing net (5) hangs through the slit (3). Closely below the plate is arranged two rollers (4) at the same vertical distance from the plate, the rollers (4) being counter rotatable, and a plane of mirror symmetry between the rollers is coincident with a middle plane of the slit (3). Finally, the cutting device (7) is arranged immediately close to the slit (3), at the underside of the plate.
