Abstract (en)

[origin: WO2006047978A2] The invention relates to a method for the production of individual components made from materials which change state from a liquid to solid or a particulate to bonded state during said method. A negative form and elastic balloons, which may be placed in the negative form under pressure, are used for the method. Either gas or liquid or the liquid material of the component for production, which may later be hardened are filled in the balloon.
