Abstract (en)

[origin: WO2006045909A1] The invention relates to a convertible vehicle with a roof comprising a first roof element (53), second and third rear lateral roof elements (57a,57b) and a fourth central rear roof element (55) extending between the second and third lateral elements, in a closed position, said first roof element (53) being articulated to the lateral elements (57a, 57b) which themselves are articulated to the structural frame (45) of the vehicle and are moved away from each other, defining between them a space which, in a closed position, is divided into a top part (61a) and a bottom part (61b), wherein the fourth central rear roof element (55) is articulated to the first roof element (53) and is engaged with the lateral elements (57a, 57b) in a closed position in order to close the top part of the space, wherein glazing (63) closes the bottom part of the space, said glazing being storable behind part of the body.
