Abstract (en)

[origin: WO2006045211A1] The invention relates to an elevator installation which comprises an elevator car (12) which is displaceably arranged inside an elevator hoistway (11) between landings (S1, S2). Said elevator car (12) has a car door (14) and the elevator hoistway (11) has respective hoistway doors (13) on the landings (S1, S2). The car door (14) or the hoistway door (13) is associated with a door sill profile (16). The aim of the invention is to point out a gap (30) or a step between the elevator car (12) and the landing (S1, S2). For this purpose, at least one light module (20, 21, 22) is arranged in the door sill profile (16) of the elevator car (12) or of the landing (S1, S2).
