Abstract (en)  
[origin: WO2006042506A1] The invention relates to a method for producing a component which is coated with a wear-resistant coating, in particular a corrosion-resistant coating or erosion-resistant coating, in particular a gas turbine component. Said method comprises the following steps; a) a component (10), whereby the surface (13) thereof is to be coated, is prepared; b) the component (11) is at least partially coated on the surface thereof with an at least hard double-layered and/or at least soft double-layered wear-resistant coating (14). The wear-resistant coating (14) comprises at least one relatively soft layer (15) and at least one relatively hard layer (16); c) the at least partially coated component on the covered component surface thereof is surface hardened.
