Abstract (en)  
[origin: WO2006042648A1] The invention relates to a ventilator system, especially for cooling the engine of a motor vehicle, said system comprising at least one ventilator provided with a ventilator motor, a control appliance, and an actuator for an air flap. The inventive ventilator system also comprises a ventilator control system which is integrated thereinto and is used to autonomously control the ventilator motor(s) and the actuator(s) for air flaps.
