Abstract (en)
[origin: WO2006042771A1] The invention relates to a method for updating software for an electronic unit (1), wherein a transmission plan is provided to said electronic unit (1), indicating at which time a software package required for the update is made available, so that at an appropriate time the electronic unit (1) is switched to a ready-to-receive state for the software package to be loaded into the electronic unit (1).
