Abstract (en)

[origin: US2006075405A1] A method for allocating threads to a user in a computer system is described. The method comprises queuing up work for a first user and permanently assigning a first thread to the first user, wherein the first thread performs the queued up work for the first user, and wherein each time work is subsequently queued up for the first user, the first thread performs the queued up work for the first user.
