Abstract (en)

[origin: WO2006039150A1] A method for providing a Mailer, Post or Recipient with detailed information regarding attributes of mail entities, said method comprising the steps of: capturing values of attributes on a mail entity (402); capturing unique identity information present on a mail entity; detecting values of attributes which are outside of expected ranges (403); classifying the attributes which are outside of expected ranges (411); and communicating the attributes which are outside of expected ranges to the mailer using the unique identity information as a reference (409).
