Abstract (en)

[origin: WO2006018573A1] The invention relates to a method permitting, in a simple and ergonomic manner, the development of a file library associated with a software product determined by a user, this user having an item of computing equipment. The inventive method comprises: a step, for the operator, of associating, with each file, a presentation file to which items of destination information including the specification of a determined location of the file library are associated so that the presentation files can be presented in the item of equipment of the user at the same time the presentation files are already located in the library.
