Abstract (en)

The drive has a propeller with wing blades, where the propeller is driven by a synchronous motor whose input power is 5 kilowatt, and has a diameter between 25 and 40 centimeters. An inclination of the blades changes in a radial direction, where the inclination such as axial inclination or radial inclination, number and cross-section profile of the blades depend on torque characteristics of the motor. An independent claim is also included for a method for optimizing a boat drive.

Abstract (de)

Die Erfindung betrifft einen Bootsantrieb mit einem Synchronmotor und einem von dem Synchronmotor angetriebenen Propeller mit Flügelblättern, wobei sich die Steigung der Flügelblätter des Propellers in radialer Richtung ändert.
