Abstract (en)

[origin: EP1806469A2] The fixing part (1) has a laminar base material, an edge position (1 7), and an anchor leg (1 1) and the width of anchor leg is smaller than a hook leg (1 2). The hook leg is formed by the transformed latches (1 6) of the fixing part. The binding points of the connecting leg are guided to the other two legs transverse to the longitudinal direction of the fixing part. An independent claim is also included for a method of production of a fixing part.
