Abstract (en)

[origin: EP1806537A2] The disk has an edge area whose thickness is partially smaller than the thickness in an inner area, where the disk is made of glass or glass ceramic material. The disk is designed in a flat and round-shaped manner, and is attached in a door frame by isolated heat-resistant outer and inner seals (2, 4). The door frame is designed as a metallic door frame, where the width of the door frame is adapted to the width of a facet.
