Abstract (en)

[origin: WO2006032828A1] An apparatus and method is disclosed for forming a compacted powder slug (7) coated with a film. The powder (6), e.g. of a medicament, is compacted and enrobed to produce compacted powder slugs (7) by preferably mechanically compacting a powder (6) and forming a film (8) of a material, preferably hydroxy propyl methyl cellulose, by vacuum or pressure differential, about the surface of the powder (6) thus compacted.
