Abstract (en)
[origin: WO2006037135A1] A partition, which has a perforate body part (1) and radially extending ligulate projections (5,6) around the body, with preferably a peripheral ring (27) joining the distal ends of the ligulate projections. The partition may be flat or cup shaped and is used in the field of containment of produce, in particular where produce is contained in a closed container immersed in a liquid. A primary example of an application of the invention is in containment of natural produce such as fruit and vegetables.
