Abstract (en)
[origin: US2009225626A1] The invention relates to a device for agitating media (1), which are located on a platform (3). Said device consists of a housing (2) with an agitation mechanism, which is used to agitate the platform (3) and at least one sensor (4, 5), which is connected to a control unit (7) that is equipped with an electronic sensor system (6). According to the invention, the sensor(s) (4, 5) and the electronic sensor system (6) are located on the platform (3) and communicate in a wireless manner with the fixed control unit (7).
