Abstract (en)

[origin: WO2006042991A1] The invention concerns an air-conditioning device for premises (1). The device is provided with an air-conditioning unit (5) located in a total volume (Vc) of the premises, a false ceiling (8) configured to provide an intermediate volume (Vi) between a ceiling (4) and the false ceiling, blowing orifices (10) of the air-conditioning unit exhaling treated air into the intermediate volume and diffusing means (11) between the intermediate volume and the air-conditioned volume of the premises. The invention also concerns a method for air-conditioning premises (1).
