Abstract (en)
[origin: WO2006039952A1] The invention relates to an electric plug contact (1) which is used, in particular for setting a contact between a component (8) in the form of an electrovalve or a sensor and a base plate (9). Said plug contact (1) comprises two fork-shaped contact elements (2, 3) which are fittable with each other by a 90° rotation and form an at least four-point (4 to 7) electroconductive connection in the plugged-in position thereof.
