Abstract (en)  
[origin: WO2006048222A1] The invention relates to a distributor connection module (1) used in the telecommunication and data technology field. Said distributor connection module comprises a housing (10) which comprises a cavity wherein at least two conductor plates are arranged, and the housing (10) comprises at least one opening in a front side (13) wherein two connector modules (14, 15) can be inserted. A pivotable protection frame (30) is arranged on the housing (10), which can adopt at least two positions. In a first pivoted position, the connector module (14, 15) is free and in a second position, the protection frame (30) is arranged in a parallel manner in relation to the front side (13).
