Abstract (en)
[origin: WO2006048221A1] The invention relates to a distribution connection module (1) which is used in the telecommunication and data technology field. Said distribution connection module comprises a housing (10) which is embodied with a cavity wherein at least one conductor plate is arranged. The housing (10) comprises at least one opening in the front side (13) thereof wherein a connection module (14, 15) can be inserted. The connection module (14, 15) is connected to at least the conduction plate in the inserted state and at least one support for a lifting tool (40) is arranged on the housing (10) in a lateral manner in relation to the connection module (14, 15).
