Abstract (en)

[origin: EP1808269A1] The device has a housing (1) with an opening (7), where a blade root of a turbine blade is inserted into the housing .The housing has positioning units (8) and clamping devices to position the blade root and to fix the blade root in a positioned condition. The positioning units and the clamping device are adjusted, such that a clamping position of the turbine blade is adjustable. The positioning units and the clamping device are held in longitudinal slots of a housing bottom (2) and/or housing side walls (4,5). An independent claim is also included for a method for adjusting a holding device.
