Abstract (en)

The cylinder (10) has a cylinder body made of a carbon fiber composite material and carrying a printing pattern on a peripheral surface (34) of the body. The printing pattern is formed by a jacket layer (36) made of polymer such as rubber and photo polymer, where the layer is formed with the cylinder body as a single piece. An intermediate layer is interposed between the peripheral surface of the cylinder body and the jacket layer. The intermediate layer consists of a material that is softer than the jacket layer.

Abstract (de)

Druckzylinder (10, 40) für Flexodruck, umfassend einen Zylinderkörper (20) aus einem Kohlefaser-Verbundmaterial, der auf seiner Umfangsoberfläche (34) eine Druckform trägt, dadurch gekennzeichnet, dass die Druckform durch eine Mantelschicht (36) aus einem Polymer gebildet wird, die einstückig mit dem Zylinderkörper (20) ausgebildet ist.
