Abstract (en)

[origin: EP1808553A1] The device has an impact head supporting an impact point (4) at which radiating retainers for individual weights (2) are attached. The head forms a plate (3) which is fixed to a side piece (5) that is turned to the head. The plate connects the profile frames of the retainers with one another. The frames have detachable side pieces (8) for inserting the weights in the frames. The frames have a rectangular or a quadratic base form.
