Abstract (en)

[origin: DE102006001844B3] The device has a programming connection provided for connecting the device to a programming device, where the connection is a programming socket. A covering (1) is supported at a bearing bolt (2) in a pivotable manner, and provided for covering the connection. An electrical pushbutton module (8) for controlling the hearing device is integrated into the covering. The module has an operating unit (10) that is supported at the covering in a pivotable manner, and the covering has an insertion opening.
