Abstract (en)
[origin: WO2006052874A2] The present invention comprises a metatarsal head implant comprising a generally convex, hollow portion that fits over the metatarsal head of the great toe, a serrated stem, and one or more locking screws. The implant of the present invention may work in conjunction with either the patient's existing phalanx or one-piece phalanx implants designed and/or manufactured independently from the metatarsal implant.
