Abstract (en)
[origin: WO2006044665A2] The present invention relates to methods, kits, combinations, and compositions for treating, preventing or reducing the risk of developing a disorder or disease related to, or the symptoms associated with a neurodegenerative disorder such as neurotoxicity or a neuropathology in a subject, particularly to beta-amyloid-induced neurotoxicity and Alzheimer's disease. The invention further provides a method for inducing stem cell differentiation into neuronal cells, by administering to the patient a therapeutically effective amount of a compound of the invention.
