Abstract (en)
[origin: EP1656951A1] This invention relates to a conjugate molecule comprising at least one first portion (I) comprising a carrier sequence and at least one second portion (II) comprising at least one anti-tumor drug molecule or a protease inhibitor molecule, said conjugate molecule comprising D-enantiomeric amino acids in its portion (I). Furthermore, the invention relates to pharmaceutical compositions containing said conjugate molecule as well as to the use of said conjugate molecule for therapeutic treatment. Methods for improving cell permeability are disclosed as well.
