Abstract (en)

[origin: WO2006047997A1] Disclosed is a device (1) for applying a moisture film to printing groups of rotary presses. Said device (1) comprises a hollow moisture-applying roller (2) with a porous roller wall (3). The hollow space (5) of said roller is filled with a pressurized liquid. According to the invention, a membrane (4) whose pores are smaller than the pores of the porous roller wall (3) is provided on the interior face of the porous roller wall (3).
