Abstract (en)
[origin: US2008134636A1] For the purpose of wrapping articles, in particular groups (19) of packs, in a blank (10), use is made of a folding turret (21) having a single pocket (23) passing through its diameter. Lateral boundaries of the pocket (23) comprise belts (30, 31) which, upon introduction of a group (19) of packs with blank (10), can be moved in the pushing-in direction and which butt in a friction-free manner against legs (27, 28) of the blank (10), which is folded in a U-shaped manner. A block-form stop component (37) can be moved within the pocket (23) from one end position to the other.
