Abstract (en)
[origin: WO2006051348A1] The inventive watch case comprises a middle (10) provided with at least one pair of horns (12, 14), a hole embodied in said middle 10 disposed between the pair of horns (12, 14) and used for receiving a time-setting arbor provided with a crown (20), a pin (16) disposed between said horns (12, 14) and forming with the middle a space (18) for receiving the crown (20). Said watch case also comprises a masking device (27) mounted in such a way that it closes said space for masking it at least partially or entirely and for removing said space for making it possible to handle said crown.
